

Sunday 8/8/2010 – 3 Gun Match.

10 attendees (Thanks to all who came.)

The videos are in a lower quality than the recent IDPA videos. . . but these load LOTS faster, and they're still pretty representative.

The stage layouts show IPSC type setup/scoring, but we are sticking with the IDPA targets and scoring and (most of) the provisional IDPA 3Gun rules. I just didn't update the stage descriptions to IDPA yet.

But the scoring, and targets are so much easier, and (when we have stages that require using cover) are so much more realistic. . . They're pretty fun to shoot.

It was hot, but not too humid, not a bad day. Next month should be cooler, and I'm going to try and work in both of Mr. Mecklenburg's "Up/Down" moving targets.

Hopefully next month, both the targets, and the shooters will be moving more.

Again, thanks for all who attended. Hope to see you there again soon.
